Swiss International College of Osteopathy

## 21.-23. September 2018

We are pleased to invite you to take part in the **seminar** led by

**Hélène Loiseau BSc Ost.**

### LMO 3 OSTEOPATHIC MECHANICAL LINK – The osseous head

#### Objectives

This course presents a completely new approach to the cranial sphere, which is not based on classical functional techniques but on a detailed analysis of the osteoarticular structure using tension tests on the key points of the osseous head. The examination is rapid, complete and precise. The hierarchy of lesions through inhibitory balance tests provides a diagnosis of the dominant lesion of the cranium. The treatment of the different fixations of the osseous head by recoil is then simple and efficient.

The results achieved can be objectively ascertained not only through the Mechanical Link's tension tests but also with classical listening tests: release the structure and function (the primary respiratory movement) will be reestablished.

«A course which will no doubt revolutionise your practice of cranial osteopathy...»

#### Program

- **The craniometric points.** Finding the key points of the cranium.
- **Architecture of the osseous head.** Basic tests and treatment of the different lines of force of the cranium : beams, pillars, arches, dome and keystone.
- **The articular and membranous cranium.** Basic tests and treatment of the key points of the cranium: the 3 floors, the reciprocal tension membranes, the temporomandibular joint, the teeth, the bones of the face and the sinuses, the sutures of the vault and the sphenobasilar syndesmosis.

#### Recommended for:

Student					PG
1st	2nd	3rd	4th	5th	C.O./D.O.

#### Location:

SICO, Zinnenstrasse 7, 6353 Hertenstein

#### Time:

21. September 2016: 9am – 5.30pm  
22. September 2016: 9am – 5.30pm  
23. September 2016: 9am – 4pm

#### Cost: lunch included

CHF 690.00

#### Contact:
